

Building a Paris Agreement Compatible (PAC) energy scenario

CAN Europe/EEB technical summary of key elements

3.3 Renewable energy shares

The PAC scenario projects a fully renewable energy supply by the year 2040. The steep increase of renewable energy in the energy mix allows to outgo the EU 32% renewable energy target for the year 2030. The share of renewable energy sources in the gross final energy consumption of the EU28 reaches more than 50% in 2030.
